

SPECIALIZED AND PURPOSE-BUILT EQUIPMENT

DUC Marine Group is able to respond swiftly to the requirements of any project and can quickly create a taskforce with the required personnel and equipment. We are renowned for our ability to manufacture custombuilt equipment tailored to the job at hand.

OUR HISTORY

Dutch Underwater Contractors was established over 30 years ago as DUC Diving BV. We started in 1984 as a diving company working mainly on inland projects. Today, as a result of continuous growth and development, we are a global operator providing services across a wide spectrum of industrial sectors. To reflect our full scope of activities and expertise, we have renamed our company as "DUC Marine Group".

SURVEY & INSPECTION ■ SALVAGE ■ MAINTENANCE & REPAIR
CIVIL UNDERWATER CONSTRUCTION

WORKS WORLDWIDE

WE CAN CARRY OUT ALMOST ALL ACTIVITIES UNDERWATER. OUR EXPERIENCED DIVERS REGULARLY MAKE AN IMPORTANT CONTRIBUTION TO THE MOST DIVERSE PROJECTS IN CIVIL UNDER WATER CONSTRUCTION. THANKS TO THIS EXPERIENCE, WE ARE ABLE TO COME UP WITH AN APPROPRIATE APPROACH FOR EVERY NEW CHALLENGE AND TO GUARANTEE PROPER IMPLEMENTATION.

SOLID CONSTRUCTION REQUIRES A SOLID PARTNER:

- Parking garage construction
- Basements construction
- Dams and sheet pile cleaning and maintenance
- Dredging under boat lifts
- Corrosion prevention
- Locks and pumping stations
- Drydocks

OUR PEOPLE & VESSELS

Our team consists of certified professional divers along with vessel crew and support staff. They are ready to assist you with the preparation for and execution of your project, and with finding solutions for even the most complicated situations. We have a large crew of permanently employed divers. All divers have their own special skill set such as Concrete Repair, U/W Welding and Cutting, Salvage Works, UXO Detection and Removal, Visual and NDT inspections.

DUC owns a fleet of multi-purpose vessels for inshore and offshore purposes. For inshore contracts DUC has a variety of floating devices, work platforms and work vessels.

CIVIL INSPECTIONS

The underwater inspections of DUC Marine Group provide clarity. Our professional divers have a lot of experience in inspecting civil engineering constructions. With modern photo and video equipment, they form your eyes under the waterline, as it were. On the basis of your assignment we inspect for example composition, condition, degradation and damage.

In addition to visual inspections, we also carry out various (non-) destructive investigations, such as ultrasonic steel thickness measurements, core drilling, penetration depth measurements, taking (soil) samples and performing multi-beam surveys.

CLEAR RAPPORT, CLEAR CONCLUSIONS

THE RESULTS OF AN INSPECTION ARE SUMMARIZED FOR YOU IN A CLEAR REPORT WITH CLEAR CONCLUSIONS AND ADVICE AND A COST ESTIMATE. YOU WILL ALSO RECEIVE THE AVAILABLE IMAGE RECORDINGS AND MEASUREMENT DATA.

OUR CLIENTS INCLUDE ENGINEERING AND CONSULTANCY FIRMS, WATER BOARDS, MUNICIPALITIES, RIJKSWATERSTAAT, CONTRACTORS AND END-USERS.

MAINTENANCE AND REPAIRS YOUR MATERIALS IN SAFE AND CAPABLE HANDS

DUC Marine Group is highly qualified to take care of repairs and maintenance. We have experience with sheet piles, pipelines, piles and other related underwater materials, and we are available for all kinds of marine repairs.

DUC Marine Group has extensive experience with concrete repairs. Our expertise includes pouring concrete (grout) underwater and grout injections. Our experience ranges from dam wall repairs to reinforcing concrete piles.

DUC Marine Group has developed a method to preserve the piles against corrosion, using our Pile Encapsulation System.
